EDUCATION

Oxford Brookes University — *Oxford, United Kingdom*

BA (Hons) Business Management

Sep 2025 – May 2026

Dissertation: Supply chain analysis of AEOLON-NORDEX at the Port of Nador West Med — inbound sourcing of raw materials from Asia and Europe, and outbound export of wind turbine blades to European markets. Application of Transaction Cost Economics (TCE) and Resource-Based View (RBV) frameworks to the wind industry, project cargo logistics and emerging infrastructure.

Relevant coursework: Financial Reporting & Analysis, International Strategic Management, Decision Analysis.

Permanent Life Member, The Oxford Union Society. Member, Brookes Entrepreneurs.

EU Business School — *Geneva, Switzerland*

BBA in Business Administration

Sep 2022 – Sep 2025

Relevant coursework: Corporate Finance, Project Management, Supply Chain Management, Transformational Change Management.

Member of the Consulting Club — case competitions and live-client simulations.

Academic project: Trends in the commodities market — supply chain dynamics and transport cost structures (Corporate Finance, 2023).

Universidad Isabel I — *Spain (Online)*

Master's in Artificial Intelligence

Jan 2026 – Aug 2026

Workflow automation (Make, n8n, APIs), business applications of AI, AI legal framework, AI-driven entrepreneurship.

PROFESSIONAL EXPERIENCE

Somanador S.A. — *Port of Nador, Morocco*

Logistics & Port Operations Intern

May – Aug 2025

- Discharge and handling of NORDEX N175 wind turbine blades (M/V Superfast Levante, Nov/Dec 2025) bound for the AEOLON wind farm: cradles, lifting plans, customs coordination, and interface with OEM, EPC contractor and port authority.
- Multimodal shipment tracking (FTL and groupage) across the Morocco–Spain corridor: lead-time analysis, cost structure and backhaul economics on legs returning empty after wind-component deliveries.
- Customs clearance cycles under Somanador's AEO status (BLs, manifests, import/export declarations) and the working-capital impact of detention and demurrage.
- Port operational KPIs (berth occupancy, vessel turnaround, dwell time) in the run-up to the 2026 opening of Nador West Med, which is reshaping container and energy logistics flows across the Western Mediterranean.
- Daily interface with shipping lines, freight forwarders, port authorities and customs in Spanish, French and English.
- Direct exposure to the cost and cycle levers driving operator margins in port logistics — directly relevant to transport, logistics and infrastructure analysis in PE and M&A.

Asianeb — *Melilla, Spain*

Project Management Intern — Real Estate Development

Jul – Aug 2024

- Supported project management of residential real estate developments, coordinating public administration, architecture studios and construction contractors to keep project milestones on schedule.
- Monitored project timelines and budget execution, tracking variances between forecast and actual construction costs and flagging deviations to management.
- Followed site progress against the critical path and cost-to-complete (capex control), with direct line of sight into how delays translate into cost overruns.

- Operational and financial-control exposure transferable to real estate asset management and value-creation work in private equity.

Navantia Shipping — *Port of Nador, Morocco*

Logistics & Port Operations Intern

Jul – Aug 2023

- Supported vessel-agency operations: arrival/departure documentation, port-call coordination, and interface with customs, pilots, towage and stevedoring.
- Tracked operational and commercial KPIs (turnaround, port costs, counterparty performance) — foundation for understanding ship-agency unit economics.
- Project-cargo documentation (including wind components) involving non-standard handling and multi-stakeholder cross-border coordination.
- Multilingual environment (ES/EN/FR) with shipowners, charterers, port authorities and inland carriers.

Agriland SARL — *Rabat, Morocco*

Trade & Export Operations Intern

Jul – Aug 2022

- Supported export logistics of perishable agricultural products to European buyers: cost / transit-time / quality trade-offs typical of fresh-produce supply chains.
- Analysed distribution routes and proposed improvements to reduce transit times to export ports.
- Reviewed shipping and customs documentation alongside producers, forwarders and customs brokers (operational and compliance angle).
- End-to-end view of the farm-to-international-freight chain, connecting directly to the maritime side of the same Morocco–Europe trade flows.

CERTIFICATIONS & ACTIVITIES

Wharton Online & Wall Street Prep — *Jun – Aug 2026*

Private Equity Certificate Program — LBO modelling, due diligence, private-company valuation, operating models and PE case-interview preparation. Faculty and guest speakers from Blackstone, Carlyle, Thoma Bravo, Ares and Oliver Wyman.

Professional affiliations: The Oxford Union Society — Permanent Life Member. Brookes Entrepreneurs — Oxford Brookes Entrepreneur Society.
